Profile - Creative Design Intern

About CDSpace

CDSpace is a leading UAV Technology startup building the next generation of Drones for Logistics and Defence applications. We are the first company to execute India's first BVLOS medical drone delivery in 2019. At CDSpace, we specialize in Aerospace design, Avionics and Composite Fabrication to bring out the best in class products. We have superb in-house design and development facilities, which very few companies have. With our passion for deep tech, we envision developing truly reliable solutions for long-distance logistics and high-performance Defense UAVs.

About the Role

As a Creative Design Intern, you'll be working for all the design and creative needs of the company. This will be quite a versatile work spanning from making creatives for marketing material, webpages, internal design, UI/UX contribution and much more. You can basically choose from a pool of work and grow yourself or be the jack of all trades. Most of the time, you'll be working on bringing creative ideas to the table and implementing them for making product brochures, social media posts and web content kits. We wish to break the classical norms of typical corporate design and bring in the colorful flavors of consumer creative branding works for B2B businesses.

How you will make an Impact

- Your work will be working close to the marketing backbone of the company.
- You will experiment with various design practices and execute innovative ideas and campaigns.
- Your work will be the forefront visuals of the company and will directly make an impact on the entire industry.

What are we looking for

- Fantastic and impressive design sense and a good critic.
- Enthusiastic about creativity and has a decent design portfolio.
- Basic understanding of marketing/business needs and finding creative ways of boosting those.
- Ability and willingness to learn new software.
- Amazing Googling skills.
- Experience with brochure making, icon creation and UI kits.
- The ability to think of innovative ideas within tight deadlines.
- Great resilience for better design and feedback.
- Loves to watch and follow great advertisements.
- Have a distinctive design sense which is reflected in the portfolio.

What makes you a good fit for the role

- Experience with Photoshop, Illustrator, Blender, Canva or other similar software.
- Experience in UI Design and Figma is a plus.
- Have a passion for vehicle design, automobiles, and aviation in general.
- Knowledge of web development/ front end development is a plus.
- Team player, self-starter, tint of humor and have an entrepreneurial mindset.
- Experience in other art forms like sketching, painting, theatricals, etc. is highly appreciated.
